<b>Miscellaneous</b>	Quick Reporting Rules will be in effect for Washington buyers.
<b>Rules:</b>	

- ✓ The proposed fishery:
  - Is consistent with the 2006 Fall Management Agreement and results of North of Falcon (NOF) negotiation process.
  - Provides opportunity to harvest Chinook with limited impacts to the URB stock.
- ✓ Proposing the Astoria-Megler Bridge as the lower fishing boundary on August 13-14 is consistent with NOF, allows for additional commercial fishing area, should not adversely affect the recreational fishery, and poses limited risk of exceeding catch expectations and URB impacts for early-mid August fisheries.
- ✓ The proposed weekly sturgeon retention regulation is consistent with the white sturgeon protocol and should maintain total sturgeon landings within the 2,000 fish allocation for August fisheries.
- ✓ Closed days between fishing periods allow for fishery checkpoints to update and modify fishing periods if needed.

#### **FUTURE MEETINGS**

- A Columbia River Compact hearing has been scheduled for Thursday August 17. The Joint Staff recommends that this hearing occur at 2:00 PM via telephone to consider additional non-Indian commercial fishing periods for the week of August 20.
- The Columbia River treaty tribes may propose a Compact hearing for Friday August 18 or for the following week to consider treaty Indian commercial fishing periods.
